

Sub D

B1

1 **51.** ~~(Amended)~~ A content provider, comprising:
2 a storage system to store content;
3 a server connected to the storage system to serve the content to a local
4 service provider which provides the content to multiple clients;
5 a network port adapted for connection to a first network, the server serving
6 the content via the first network to the local service provider; and
7 a transmitter, responsive to the server, to transmit content over a second
8 network to the local service provider.

9

10 **52.** A content provider as recited in claim 51, wherein:
11 the network port comprises a connector compatible with a wire-based
12 communications network; and
13 the transmitter comprises a transmitter capable of transmitting signals over
14 a wireless medium.

15

16 Please add new claims 53-55 as follows:

17

18 **53.** A content provider as recited in claim 51, wherein the server is
19 further configured to serve the content to the local service provider in response to
20 requests from the multiple clients.
